EXPERIENCE

IT Fullstack Development

PT Arisamandiri Pratama

05/2024 - Present

- Served as IT Development Supervisor, overseeing application development projects.
- Engineered an attendance system integrated with the HIKVision ecosystem, leveraging its hardware for efficient data synchronization and robust face matching and recognition processing.
- Developed a scan-based production tracking system that monitors the entire manufacturing lifecycle, recording real-time data from individual components up to the final finished goods assembly to ensure precise inventory traceability.
- Engineered an intelligent warehouse management module that optimizes storage by recommending bin locations based on item weight and category constraints, while automating stock retrieval synchronized with PPIC schedules.
- Developed mobile applications using Flutter, and built full-stack web solutions utilizing Laravel for backend logic paired with Vue.js and React.js for the user interface.

Mobile Developer

PT Venturo Pro Indonesia

08/2022 - 04/2024

- Core Programmer for the Lazisnu application, responsible for developing key features such as zakat, infaq, qurban, and fidyah payment functionalities.
- Junior Programmer contributing to the development of the Inisa application and the Inisa Cashier app, which includes features such as scanning, payment, and authentication.
- Worked as a Junior Programmer on the INSTANKu application, developing a payment gateway using RESTful APIs, event scheduling features, and dynamic link functionality.
- Expert in implementing face recognition and face matching features & Collaborated closely with backend teams to consume RESTful APIs.

Become a Flutter Master. From zero to hero

Alterra Academy

02/2022 - 07/2022

- Participated in a certified independent study program at Alterra Academy through the Independent Campus initiative, completing the "Become a Flutter Master From Zero to Hero" course.
- Gained expertise in Flutter for complex mobile apps, Dart programming fundamentals, mobile app development, the Flutter framework, and professional skills.

SUMMARY

Software Developer with over 3 years of proven experience in architecting and managing the full software development lifecycle. As an IT Development Supervisor, I specialize in building scalable RESTful APIs using Laravel and developing high-performance, responsive frontends with Vue.js and React.js. I possess deep expertise in Mobile Development, engineering complex applications using Flutter and Native Android to handle intricate business logic.

I have a successful track record of architecting intelligent warehouse management systems, real-time production tracking, and biometric attendance systems integrated with the HIKVision ecosystem. I am highly proficient in integrating payment gateways, implementing face recognition features, and optimizing databases to ensure robust and efficient enterprise-scale operations.

SKILLS

Laravel

Vue JS

React

Flutter

Socket Io

Github

EDUCATION

Information Technology

STIKI Malang

2019 - 2023

Bachelor's degree

Graduated from STIKI Malang with a GPA of 3.84. Actively involved in campus organizations and served as the head organizer for the SSC IX event. Additionally, worked as a teaching assistant for the basic programming course.
